

It's that time of year again - bird migration. Did you know that over 300 species of birds have been documented in Blanco County? Golden-cheeked Warblers, the only all Texan bird, have already arrived and the beautiful Painted Buntings will follow soon.

The next BCCI community gathering will feature Highland Lakes Master Naturalist Robin Miskimins sharing information on birdwatching and spring bird surveys.

Come join us at 7:00 pm on April 28, 2026 at the Gem of the Hills, 2233 US Highway 281 North in Blanco.
